Objective

Highly motivated Computer Science Engineering student constantly seeking to engage my knowledge to learn something useful and keep challenging myself to be a better performer in accordance with the company's requirements. I want to learn and grow while helping the company.

Skills

Programming Languages: Java, C, JavaScript

Web Technologies: HTML, CSS

Frameworks: React.js, Node.js

Databases: SQL, MongoDB

Version Control: Git, GitHub

Education

Bachelor of Technology in Computer Science and Engineering

Techno Engineering College, Banipur

2023–2026

CGPA: 7.54 (75.4%)

Diploma in Computer Science and Technology

Canning Government Polytechnic

2020–2023

CGPA: 7.95 (75.7%)

Secondary Education

Sanskrit Collegiate School

2019

Percentage: 54.71%

Projects

FixMyCity

Smart India Hackathon (SIH) 2022 — Problem Statement ID: 25031

Developed a mobile-first civic issue reporting and resolution platform enabling citizens to report civic problems with image uploads, automatic geolocation, issue categorization, live status tracking, department-wise routing, and an administrative dashboard. Built using the MERN stack with secure authentication, Cloudinary media storage, REST APIs, and scalable backend architecture.

GrandForge Analyzer

Designed and developed a modern chess analysis platform inspired by Chess.com and Lichess. Integrated Stockfish WASM engine analysis, move classification, evaluation graphs, opening recognition, engine recommendations, interactive chessboard visualization, and comprehensive post-game review workflows. Focused on performance optimization, modular architecture, and responsive user experience.

Job Portal

Full-stack job portal application enabling interaction between job seekers and recruiters.

GitHub:

<https://github.com/debmalyo-hub07/job-portal-2.0>

NexMart

Developed a production-grade full-stack e-commerce platform using Next.js, Node.js, MongoDB, Razorpay, NextAuth, OTP verification, REST APIs, and an admin dashboard for products, users, and orders. Designed a scalable service-layer architecture with optimized UI/UX and secure payment integration.
